

Ministerie van Klimaat en
Groene Groei

Dialogue and Societal Perspective

Justine Oomes

Salt Workshop 16 oktober 2024

Rijksoverheid

Staattoezicht op de Mijnen
Ministerie van Economische Zaken
en Klimaat

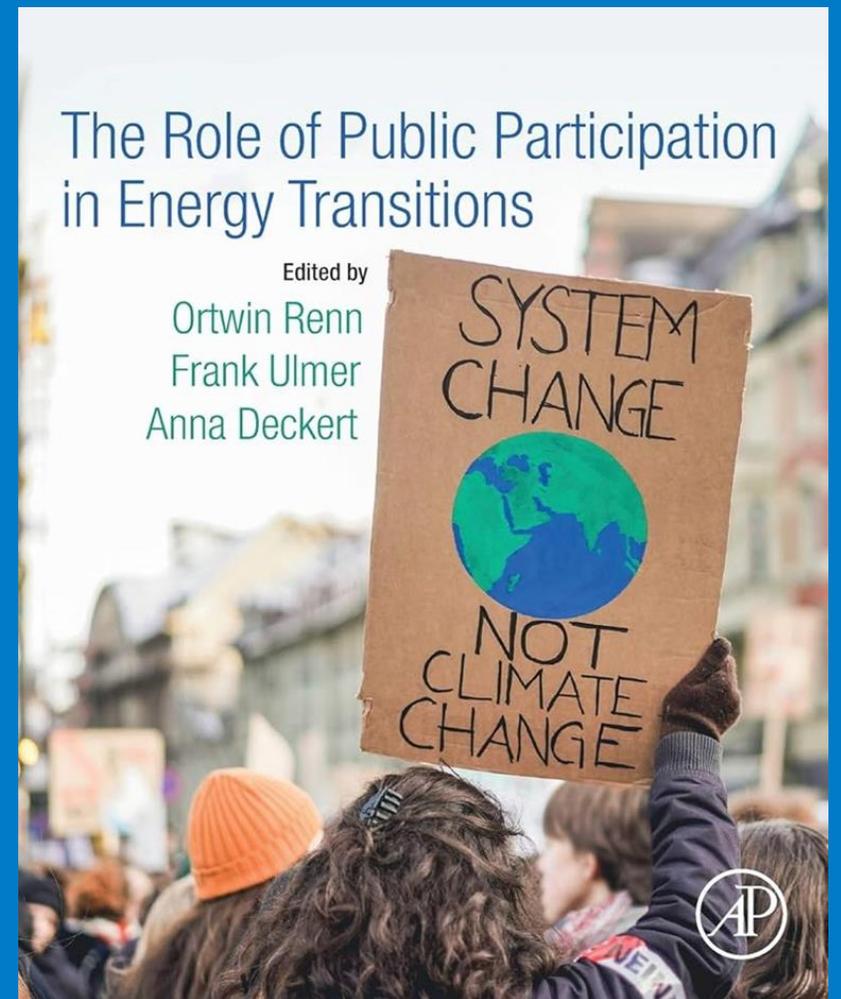

DEEP KBB

TNO innovation
for life

The energy transition is more than technological solutions. It is a social, socio-economic transformation towards a new system of values and relationships in society.

A transition affects people because what they are used to is being questioned and working methods that have functioned well for decades change.

> Public Values

Bron: PBL

> Technocratic

$$W = \frac{1}{2\mu_0} \left[\frac{\Psi^2 \pi^2}{b^2} \sum_{m,n} a_{mn}^2 n^2 (ab/4) + \frac{\Psi^2 \pi^2}{a^2} \sum_{m,n} a_{mn}^2 m^2 (ab/4) + \Psi^2 ab \left(\mu^2 + \sum_{m,n} \frac{8a_{mn} \mu^2}{\pi^2 mn} + \frac{a_{mn}^2 \mu^2}{4} \right) \right]$$

$$W = \frac{\Psi^2 ab}{2\mu_0} \left[\mu^2 + \sum_{m,n} \left(\frac{a_{mn}^2}{4} \left(\frac{m^2 \pi^2}{a^2} + \frac{n^2 \pi^2}{b^2} + \mu^2 \right) + \frac{8a_{mn} \mu^2}{\pi^2 mn} \right) \right]$$

= veilig!

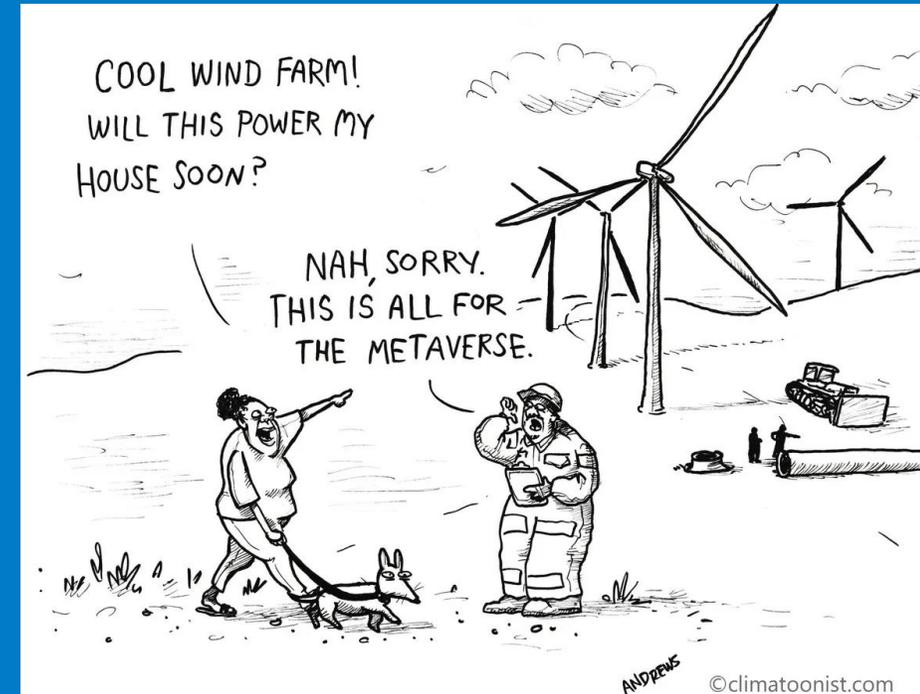

Acceptance of techniques and policy is the most important key in the progress of the energy transition.

Societal perspective is important, without it;

- people do not recognize themselves in projects or policy¹,
- support for new techniques or energy policy decreases², and
- increases the willingness of Dutch people to engage in (violent) resistance.³

Coalition agreement
2024:

“We can only
achieve the climate
and energy task in
dialogue with
society”

Part of society still does not feel represented in policy⁴ and has the feeling that plans have already been drawn up, decisions have already been made and the government is not doing enough with the input from stakeholders⁵.

WHAT IS THE AGENDA BEHIND PUBLIC PARTICIPATION ?

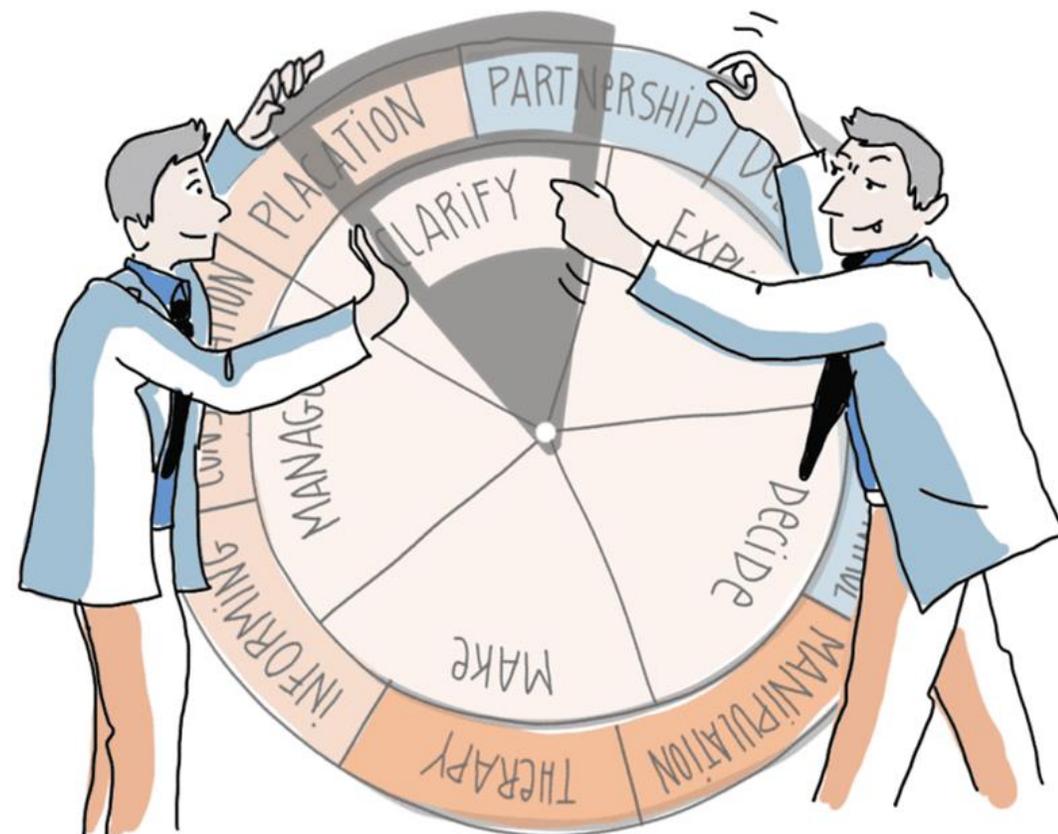

Public participation is not: Stakeholder Management, Explaining, Informing or Temporary

Public participation

IS

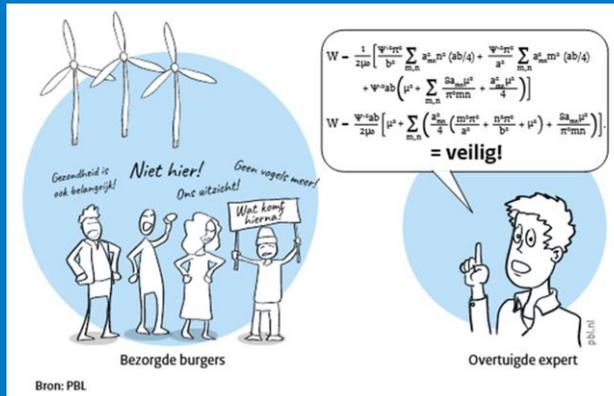

- > Gaining insight
- > Listening
- > Having conversations
- > Building a relationship
- > Long lasting

©The urban mycelium

- > Values
- > Experience
- > Local knowledge

- > Scientific knowledge
- > Data
- > requirements

Formula of Knowledge⁶

$$K = f(I * E S A)$$

Knowledge is the function of the Information we have, combined with our Experiences, Skills and Attitude towards the subject.

- > Experts, residents and organization work together
- > In co-creation and joint fact finding
- > Learn to understand each other and build trust
- > Sharing information that matches the issues/wishes of the other person

Participation - Factors of succes⁷

- › On an urgent, concrete, topic.
- › Starts 'early in the process', so that the results of the participation can be included in the processing process.
- › take other (recent) (participation) projects into account – combine
- › scope and preconditions must be clear to all parties and are appropriate to the resources and capacity.
- › Work together with existing resident groups and local organizations
- › Ensure commitment to the participation process from companies and government.
- › Using a professional, independent moderator/facilitator during meetings.
- › Ensure clear, understandable, concrete language and information, so that participation is accessible to everyone.

An example

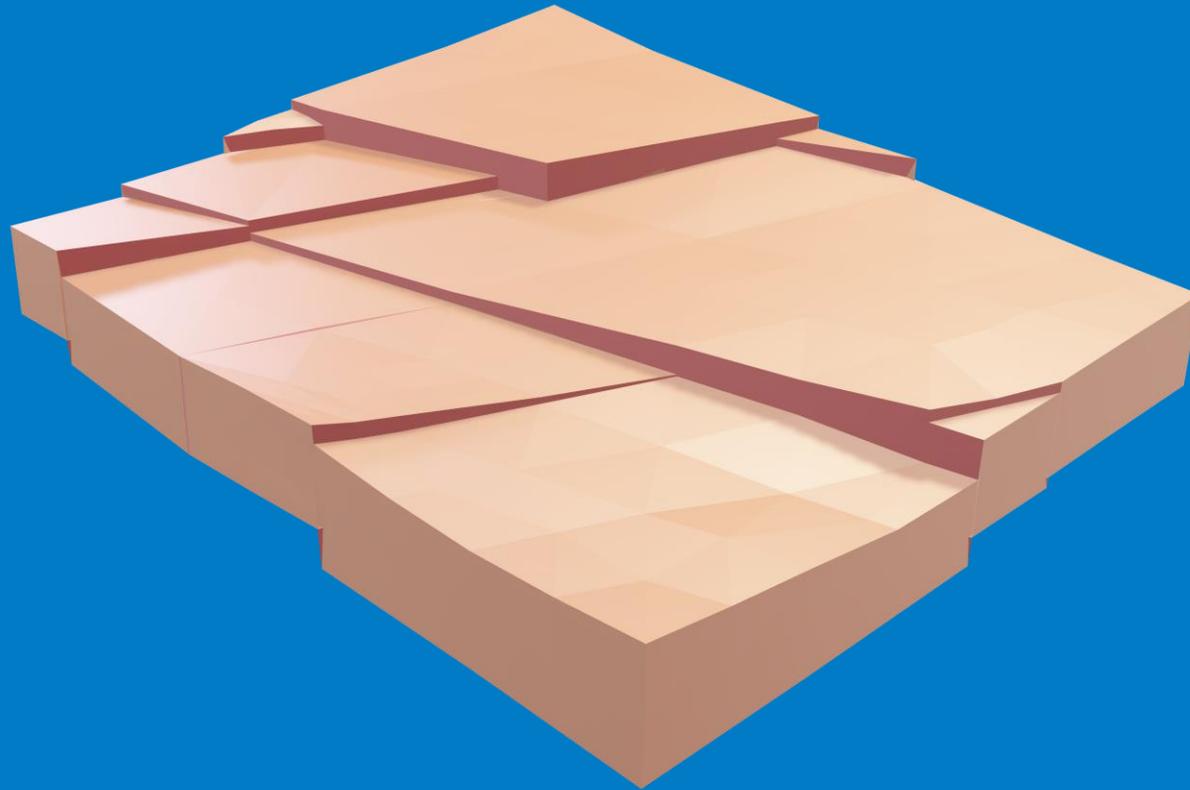

Local (mis)information:

Small gasfield or
one big gasfield

Ministerie van Economische Zaken
en Klimaat

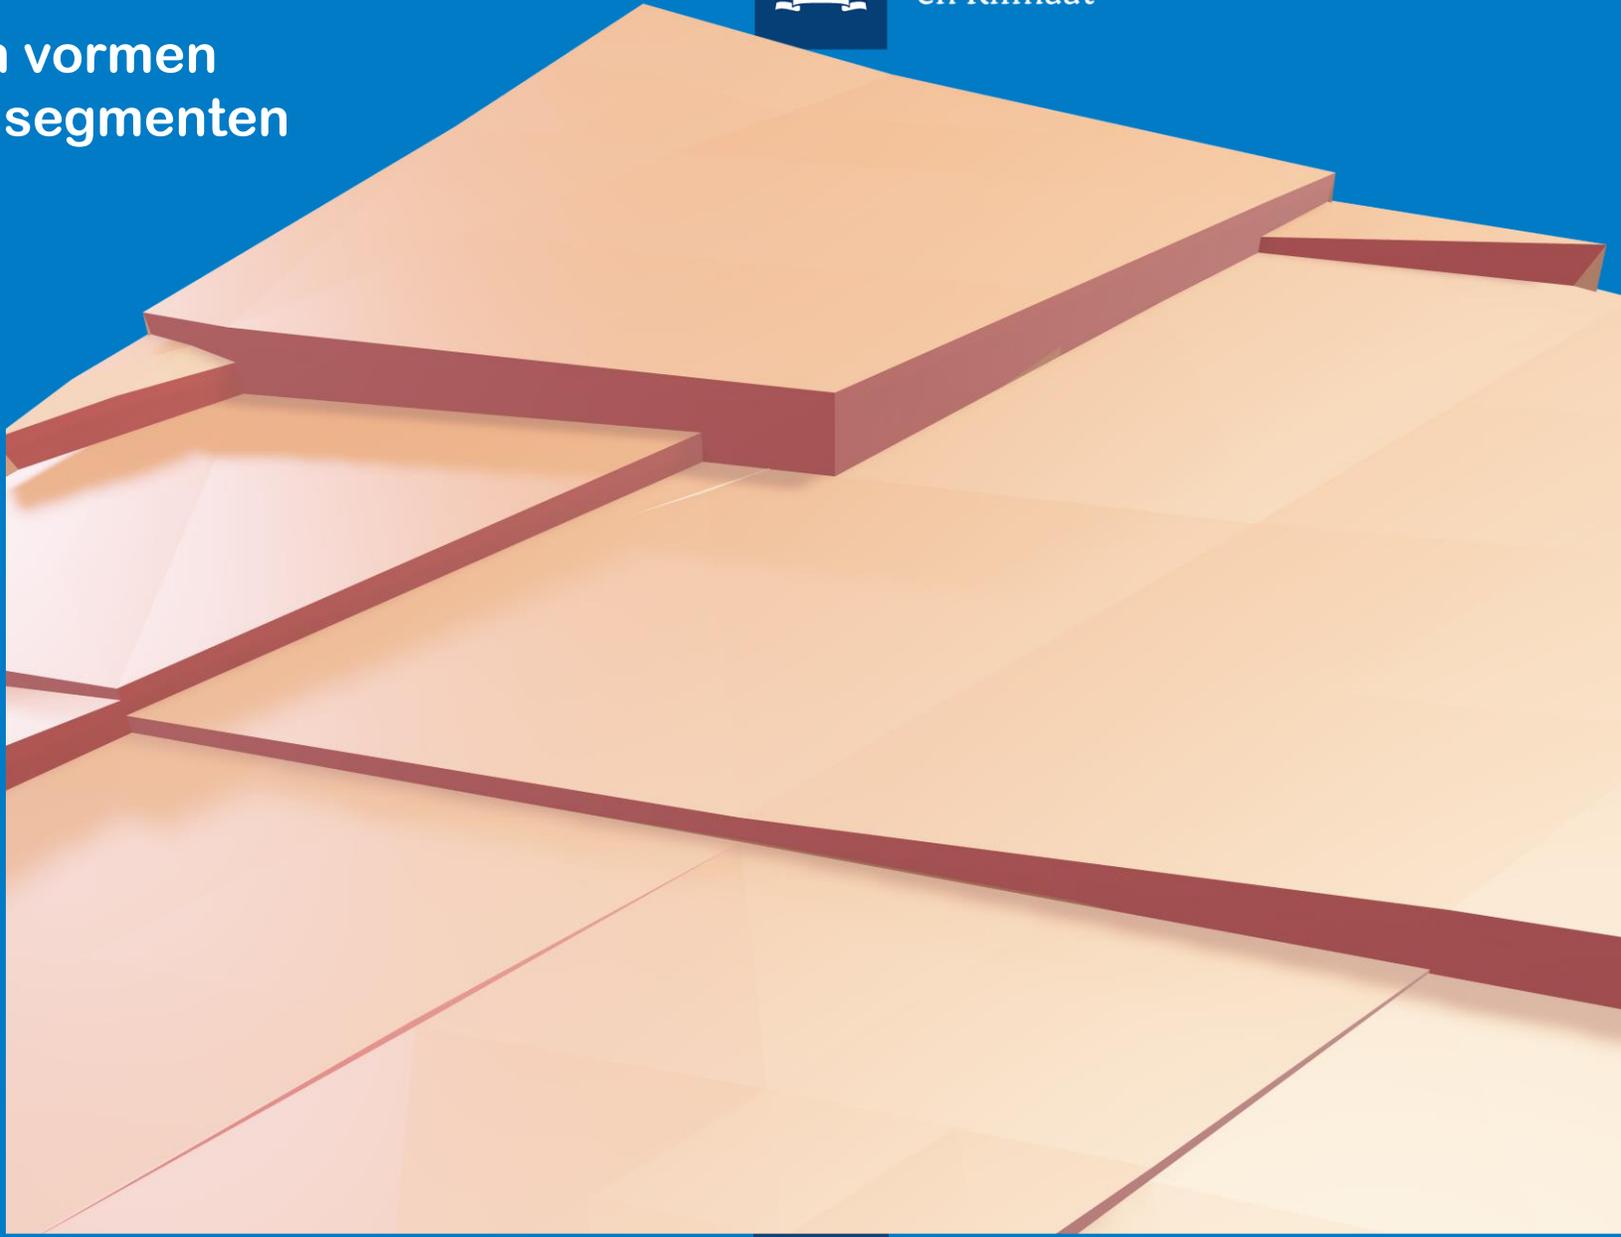

De zandsteenlaag waar het aardgas in zit, is doorsneden door natuurlijke breuken

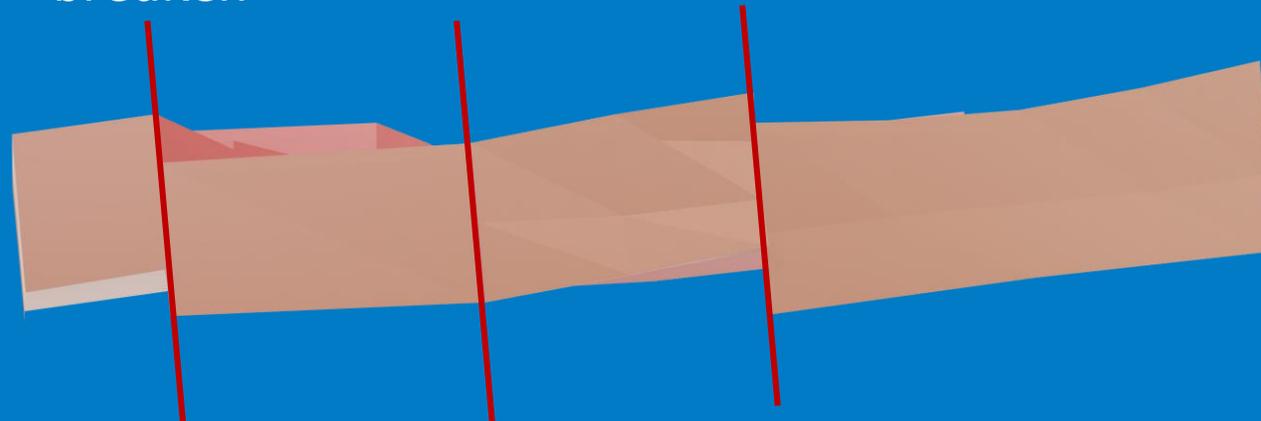

Ministerie van Economische Zaken
en Klimaat

Deze breuken vormen
afgebakende segmenten

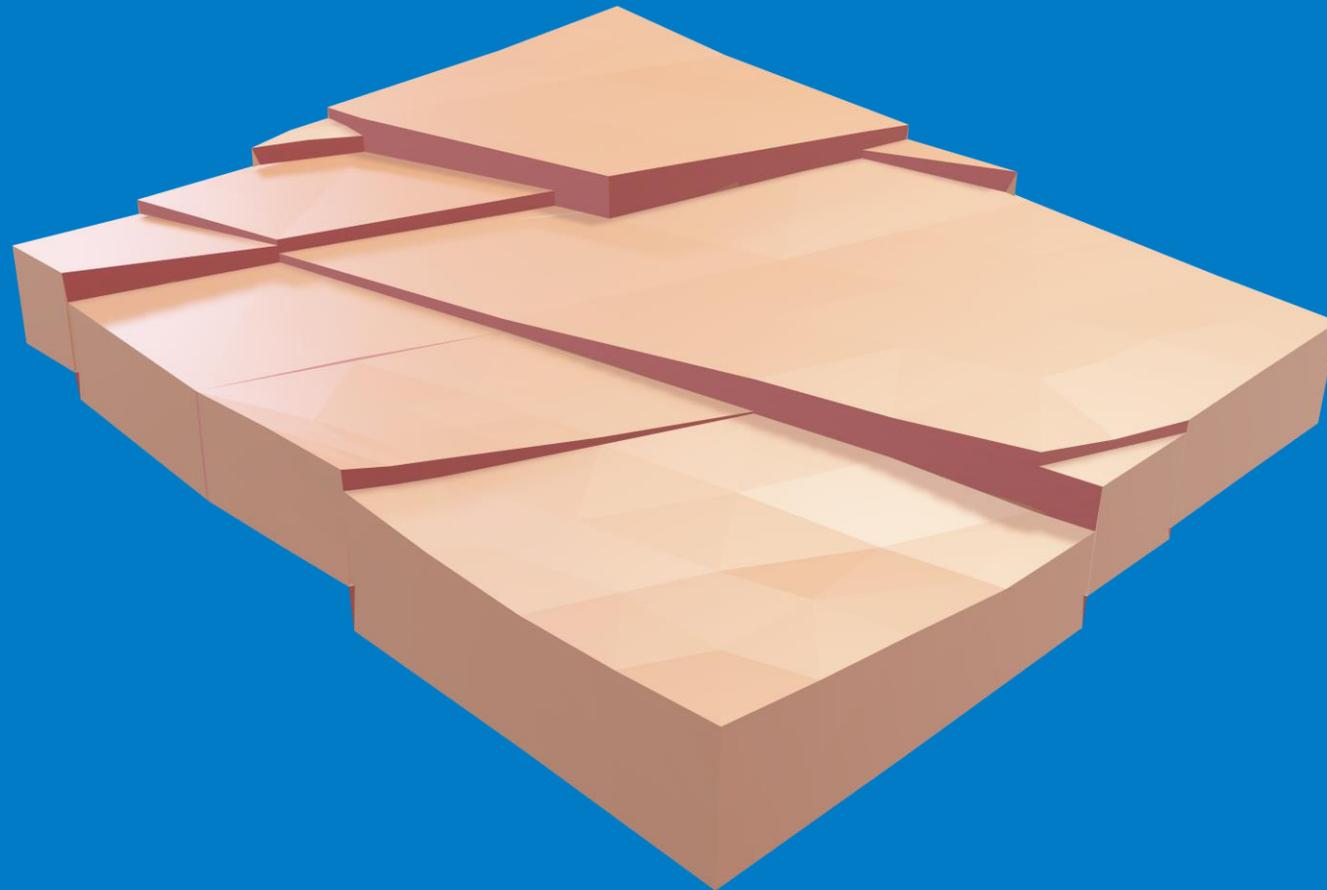

breuken

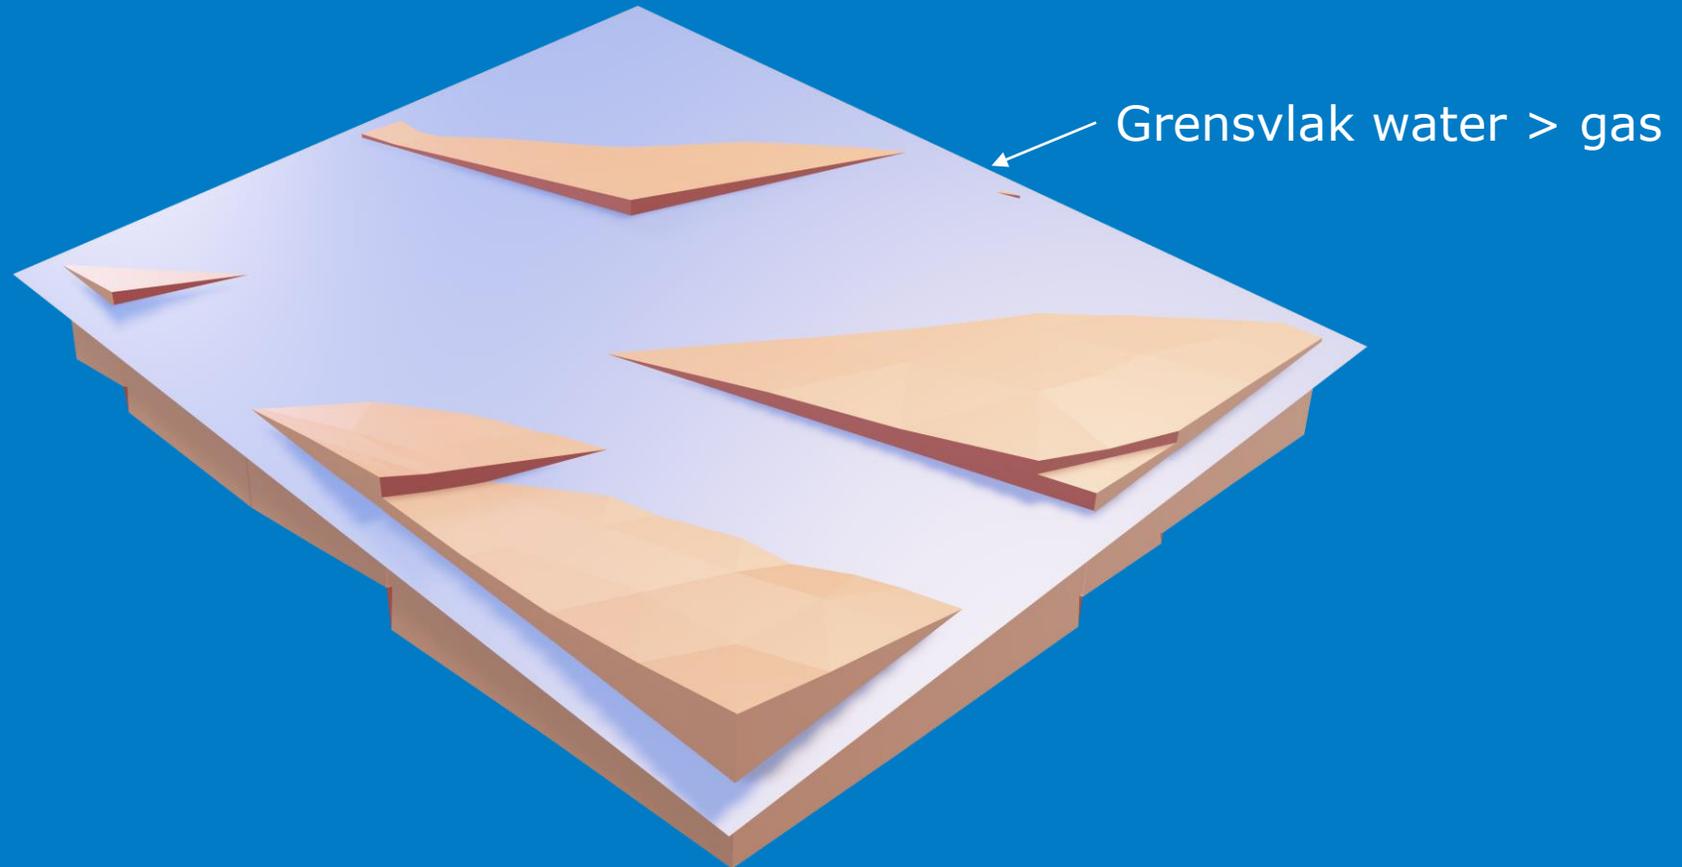

Door natuurlijke bewegingen zijn de blokken licht gekanteld

Ministerie van Economische Zaken
en Klimaat

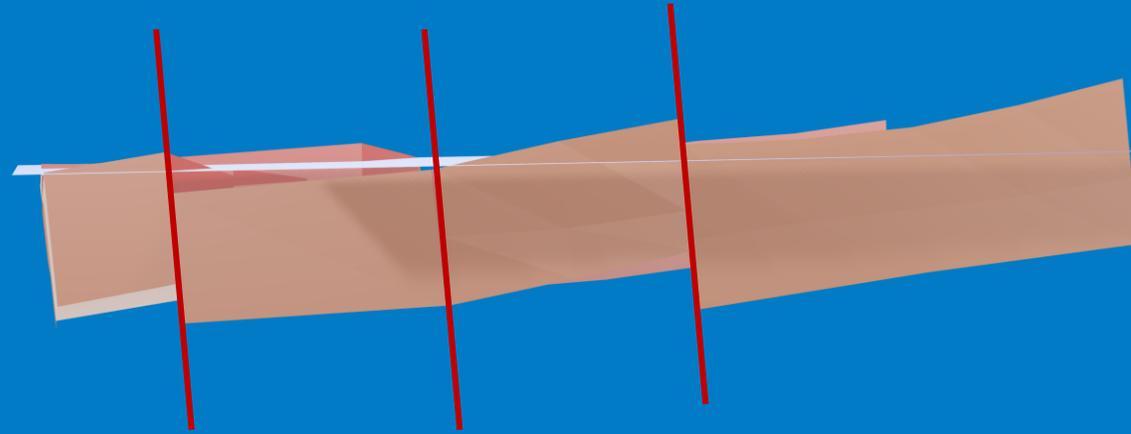

De zandsteen is gevuld met water. Daarboven zit het gas gevangen onder een afsluitende laag

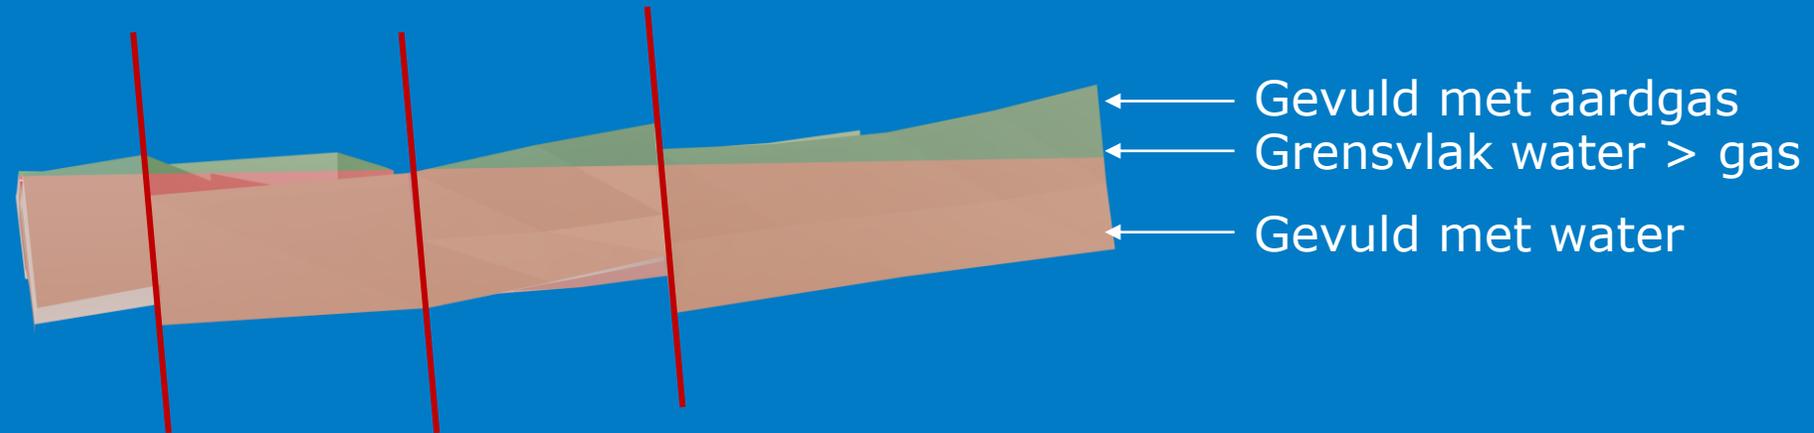

Het grensvlak tussen gas en water loopt als een horizontaal vlak door het gesteente

Ministerie van Economische Zaken
en Klimaat

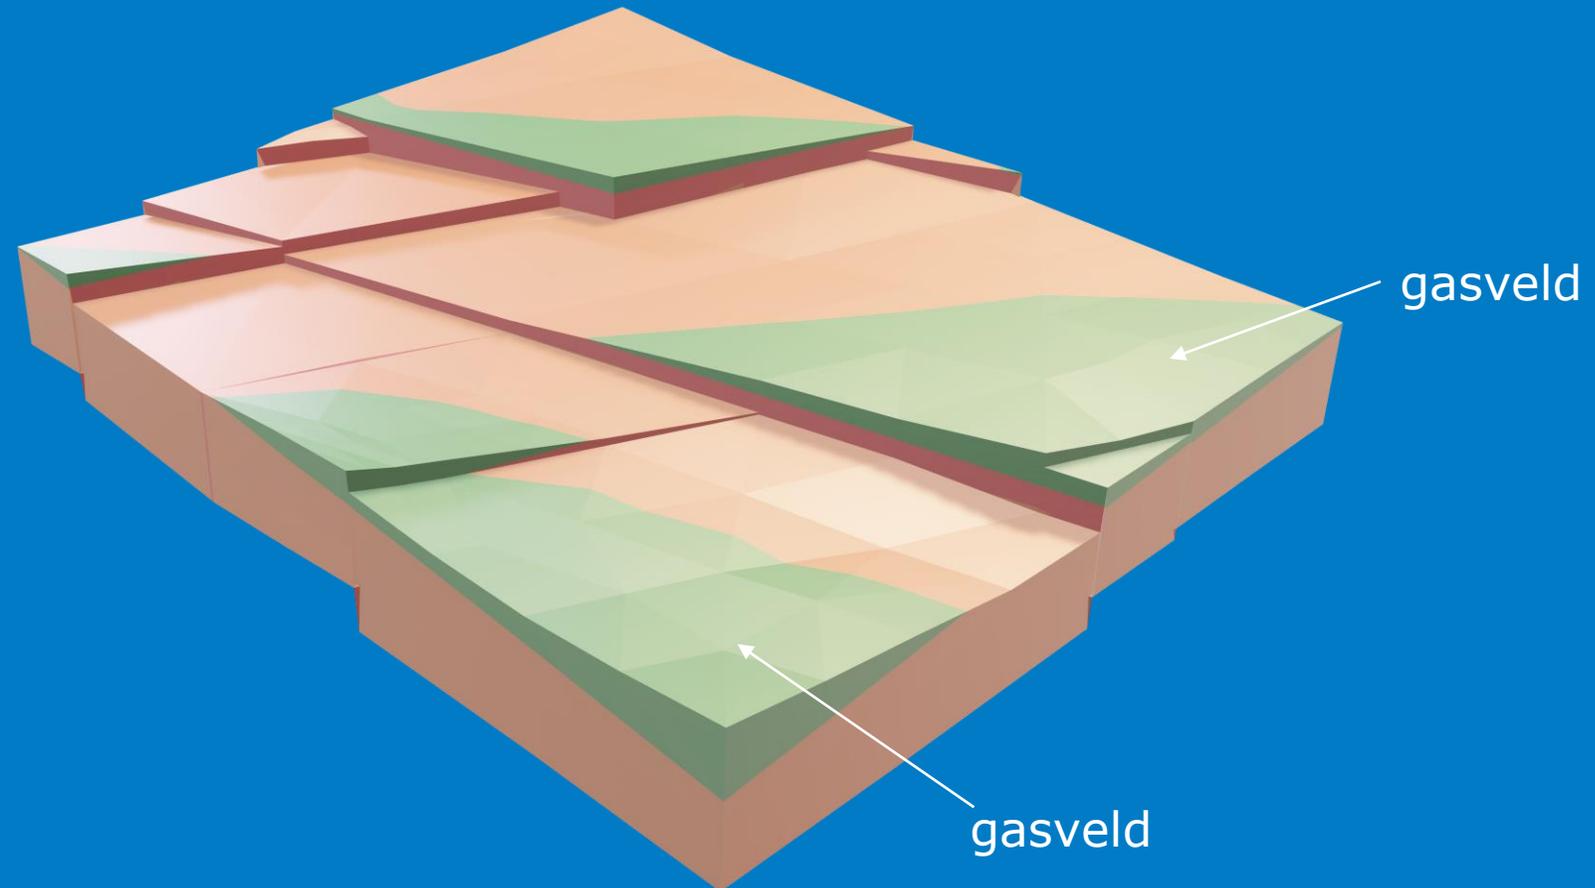

Hier is het grensvlak zichtbaar in het zij-aanzicht

Het aardgas zit boven het water

Door de kanteling van de segmenten ontstaan hierdoor afzonderlijke gasvelden

Products for dialogue and societal perspective in policy

- > Toolkit to embed dialogue in the policy process
 - which methodology fits in which phase of policy development,
 - what does it require in terms of time and money,
 - how do you reach difficult-to-reach target groups,
 - templates for invitations and discussion guidelines
- > Customer relationship managementsystem

Societal involvement and participation can not only lead to better policy&projects but also to greater acceptance of that policy&projects
